

Vibrant Hydrant Program

We are happy to announce “The Vibrant Hydrant Program”. It is a program designed to help the city and its residents to display their character, pride, skill, and talent.

We have selected hydrants throughout the Valley Center area that participants can display their artwork. Hydrants that were chosen are in key locations throughout the city such as local parks, Main Street and Meridian.

The idea is for a participant to choose a theme to paint a hydrant, which must be pre-approved by the city (examples have been illustrated but, are not limited to these designs). The basic supplies will be made available by the city such as paint and paint brushes. The only thing you will need to provide is your time, talent, and creativity.

For participation information contact the Valley Center Fire Department at (316) 755-7303 or you can E-mail us at: ptennissen@valleycenterks.org benglish@valleycenterks.org or ltully@valleycenterks.org

Vibrant Hydrant Program

Application

Contact Name: _____

Phone Number: _____

Email Address: _____

Hydrant Theme: _____

Requested Start Date: _____

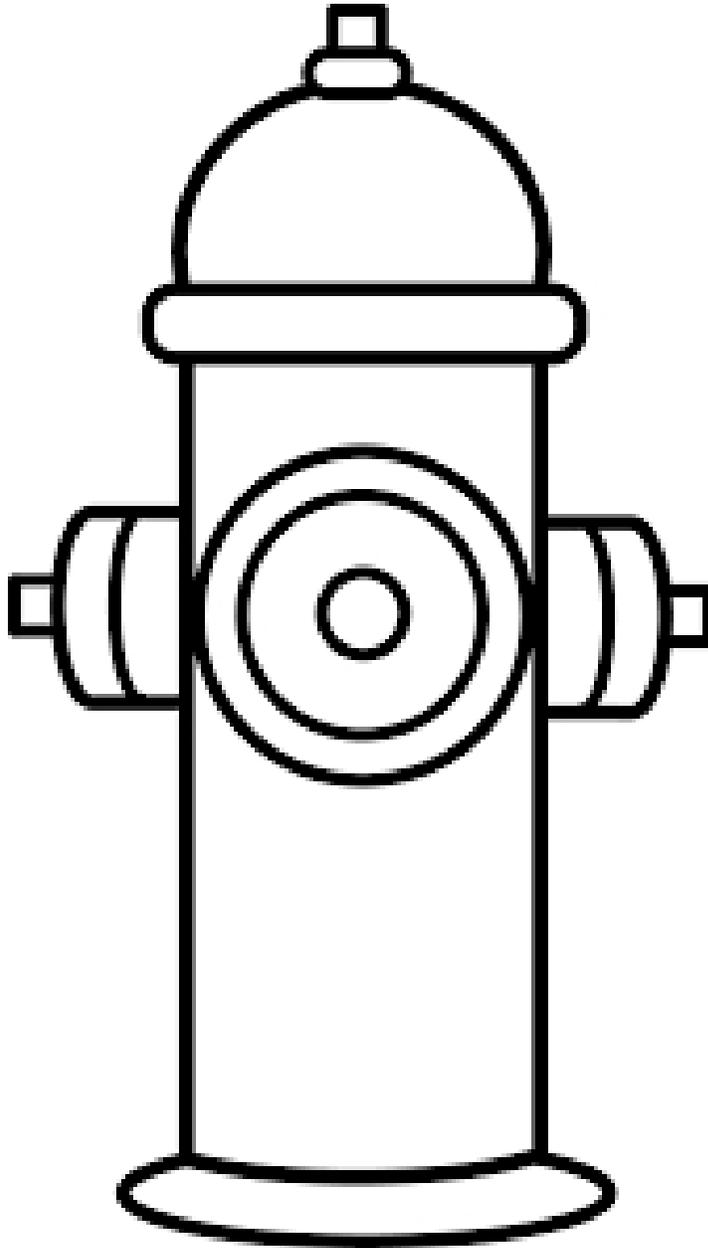

After the receipt of this application we will expediently review your information. Please include a photo or sketch of the theme that you would like to apply. Once approval has been granted we will contact and assign the applicant a hydrant. After the applicant has been contacted and assigned a hydrant, a representative will provide painting instruction

"We appreciate your application and interest in the Vibrant Hydrant Program".

Vibrant Hydrant Program

Please display your theme here for review.

Vibrant Hydrant Program

PAINT INSTRUCTIONS

- Select a day to paint your hydrant that's sunny and not raining.
- The outside temperature needs to be at least 50 degrees Fahrenheit.
- Ensure that the hydrant is dry and free from dirt or other contaminants by using a rag to wipe off any moisture and dirt.
- Lightly brush off any loose or chipping paint on the hydrant with the wire brushes provided.
- DO NOT remove fire hydrant caps to paint as to not get paint on the threads.
- If your hydrant is near cement, take care to not get paint on the cement by placing down a tarp.
- The preferred paint is an enamel paint that is designed for metal surfaces, these can be purchased at most any hardware stores that sell paint. However the colors may be limited in this type of paint. A durable exterior latex paint can also be used if needed.
- Spray paint is also acceptable to use and may provide a wider variety of color to fit your theme.
